Laser cut and formed sheet metal parts

✓ fast ✓ competitive ✓ reliable

Deadline pressure, price competition and high quality requirements are the essential factors that define today's business world. The Internet is being used increasingly for information and fast sourcing of products and services. Since 2010 it has been possible to have custom laser parts calculated on our online portal www.laserteile4you.de and then order them directly. And you can do it with only a few clicks, round the clock, 365 days a year.

A many faceted company

Our company has more than 30 years of experience in laser machining of thin and thick sheet and is a true allrounder in sheet metal processing. We offer great proficiency in processing sheet steel, stainless steel, aluminium and copper. You can, of course, specify other materials at any time. Our range is expanding on a continuing basis. Take advantage of our know-how and wide range of services.

It couldn't be easier

Once you have registered, you can upload DXF and STEP files at any time. The system calculates the individual price fully automatically within seconds – from prototype to batch production – without you having to download software to your computer.

Time-consuming requests for quotations are a thing of the past and ordering via our online portal is easy. We always guarantee:

- high quality
- advanced technology
- optimum process reliability
- favourable conditions
- reliable delivery

Made in Germany

Good reasons in favour of Laserteile4you ...

Quality 'Made in Germany' on favourable conditions

Technologically optimized and coordinated processes achieve fast throughput times and thus reduce production costs.

Ongoing investments in the latest technologies at Laserteile4you provide you with the prerequisites for top quality and highly economic production. To your advantage.

Latest technology

As individual as every laser part requested may be, our machine shop is just as versatile – be in thin or thick sheet, a one-off part or batch production. The laser parts are processed in three-shift operation on advanced laser machines from market leader Trumpf. The production and logistics of Laserteile4you are certified according to EN ISO 9001:2008 and EN ISO 14001:2004 and the observance of tolerances for laser processing according to DIN 2310/ DIN EN ISO 9013 is standard for us.

Choice of materials and availability

Due to the wide variety of orders that pass through our production shop every day, we can guarantee a wide choice of materials and prompt availability. Laserteile4you is constantly enlarging its range of materials. In addition, the high volume of our raw material orders means that our customers profit from our good purchasing conditions.

Preferred delivery dates and demand-based delivery

You have a choice of delivery within 2 days* or up to 4 weeks – collection from the factory is also possible. Deliveries at short notice are made possible through continuous optimization of in-house procedures – from programming to logistics.

** Delivery within 2 days is possible only from the 2nd order onwards.*

Flexible terms of payment

The choice is yours: Payment by credit transfer or by PayPal. If orders are placed regularly there is the convenient option of payment against invoice. The prices in our online portal are constantly reviewed and calculated optimally for you.

The team

Behind our Laserteile4you online portal is a many-faceted sheet metal processing company with a strong service team which supplies you with competent advice and support. Every enquiry is answered promptly and personally by our technicians and engineers.

Tradition and progress

A company with added value

Our company solves all production tasks in sheet metal and tube machining in-house.

Modern and economic production takes place in 12 specialised departments. From product design to simple cutting operations, including all other processing techniques up to and including pre-mounted assemblies – fully equipped with electronic components if required.

If you are interested in further processing, please use 'Contact requested' in the portal.

We are your reliable partner for outsourcing your laser part fabrication – and, if required, for all components and tasks involving sheet metal machining.

- **Some 70 years of experience**
- **More than 380 well-trained staff**
- **Own apprentice workshop with 37 apprentices**
- **Modern quality management**
- **Responsible use of resources bears witness to a sound company philosophy and sustainability**
